SUMMARY

A results-driven web developer with 4+ years of professional experience building, maintaining, and optimizing backend-focused web applications.

EXPERIENCE

Software Engineer (Laravel) – ElectronicFirst (Remote, UAE) | 10/2021 – Present

Tech Stack: Laravel, MySQL, Clickhouse, REST APIs, Livewire, Alpine.js, Git, Linux

- Developed and maintained Laravel backend features for in-house production systems.
- Refactored and optimized codebases and MySQL queries to improve performance and scalability.
- Debugged and resolved backend issues to ensure system stability and uptime.
- Integrated third-party payment/service APIs and built RESTful APIs for mobile and external systems.
- Implemented web automation and data scraping using Puppeteer and BrowserKit.
- Managed Laravel upgrades and enforced framework best practices.

Laravel Developer – AMCoders (Remote, Bangladesh) | 01/2021 – 07/2021

Tech Stack: Laravel, MySQL, jQuery, AJAX, Git

- Developed Laravel-based applications including ticketing and management systems.
- Implemented secure authentication workflows (2FA, multi-auth, email verification).
- Integrated payment gateways (Stripe, PayPal) and third-party APIs (Mailchimp, Twilio).
- Built dynamic user interfaces using jQuery, AJAX, and jQuery UI, including Kanban-style features.

EDUCATION

B.Sc. in Computer Science & Engineering – Port City International University | 2020

Diploma in Computer Technology – Daffodil Institute of IT | 2016

PROJECTS

- Faculty Class Routine Management System – Laravel, Bootstrap, MySQL
  Developed a role-based academic scheduling system with class routines, user management, and database-driven timetables.
- E-Bank – Online Banking System (AMCoders)
  Built core backend features including user authentication, transaction handling, and secure payment workflows
- Lenden – Multipurpose Payment Gateway System (AMCoders)
  Developed backend modules for payment processing, third-party gateway integration, and transaction management.
- Timelock – Project Management System
  Implemented task tracking, user roles, and time-based project workflows for internal team management.

TECHNICAL SKILLS

Backend: Laravel, Livewire, CodeIgniter

Frontend: Bootstrap, Tailwind CSS, Alpine.js, jQuery, JavaScript

Database: MySQL, ClickHouse

Tools & OS: Git, VS Code, Dbeaver, Sequel Ace, PhpStorm, Linux, macOS

LANGUAGES

- Native Bengali
- Fluent in English (Reading, Writing, Speaking)
